

# TRENDS

in LAMINATE

Roanoke Hickory

WATER RESISTANT • REALISTIC • DURABLE

**Trends in Laminate** is a multi-layer flooring product comprised of an inner core, a photographic layer, and a protective layer that have been fused together through a lamination process. This production process is notable for

its resulting realism and durability, and these traits are on full display in the Vista collection. The Vista collection pairs captivating natural visuals with premium construction and water resistance. The wide planks and

embossed texturing of these floors bring natural allure to a space, and a range of on-trend colors offers endless design possibilities.

### WATER RESISTANT

This collection is resistant to surface damage from moisture under normal use, and these floors can be maintained using a residential damp mop.

### REALISTIC

Embossed texturing gives the floor a natural look and feel, and a carefully curated color palette reflects the tones of North American wood visuals.

### DURABLE

With a wear layer rating of AC4, these sturdy laminate floors are strong enough to withstand moderate commercial or high residential traffic.
